I have had this time

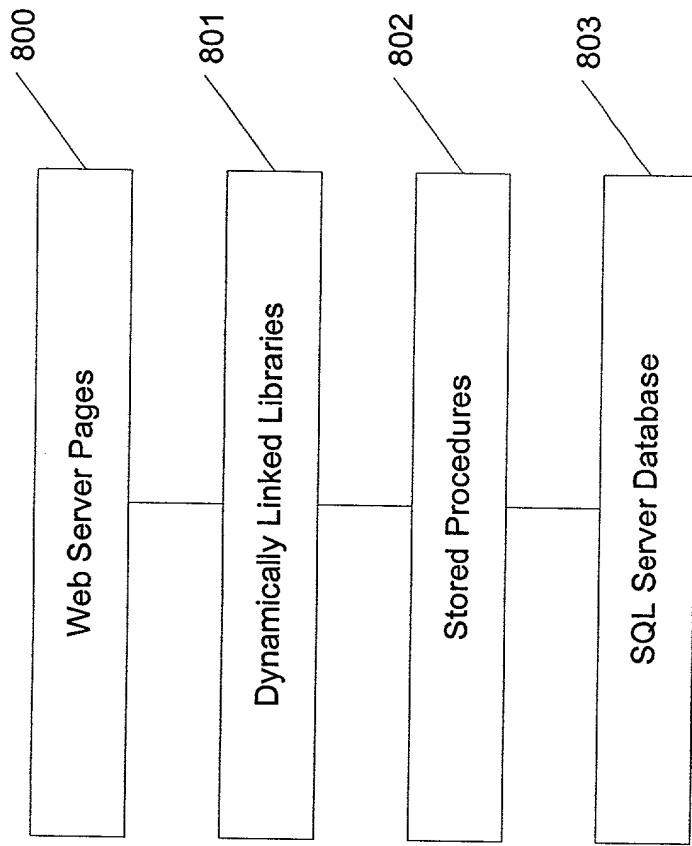

Figure 5

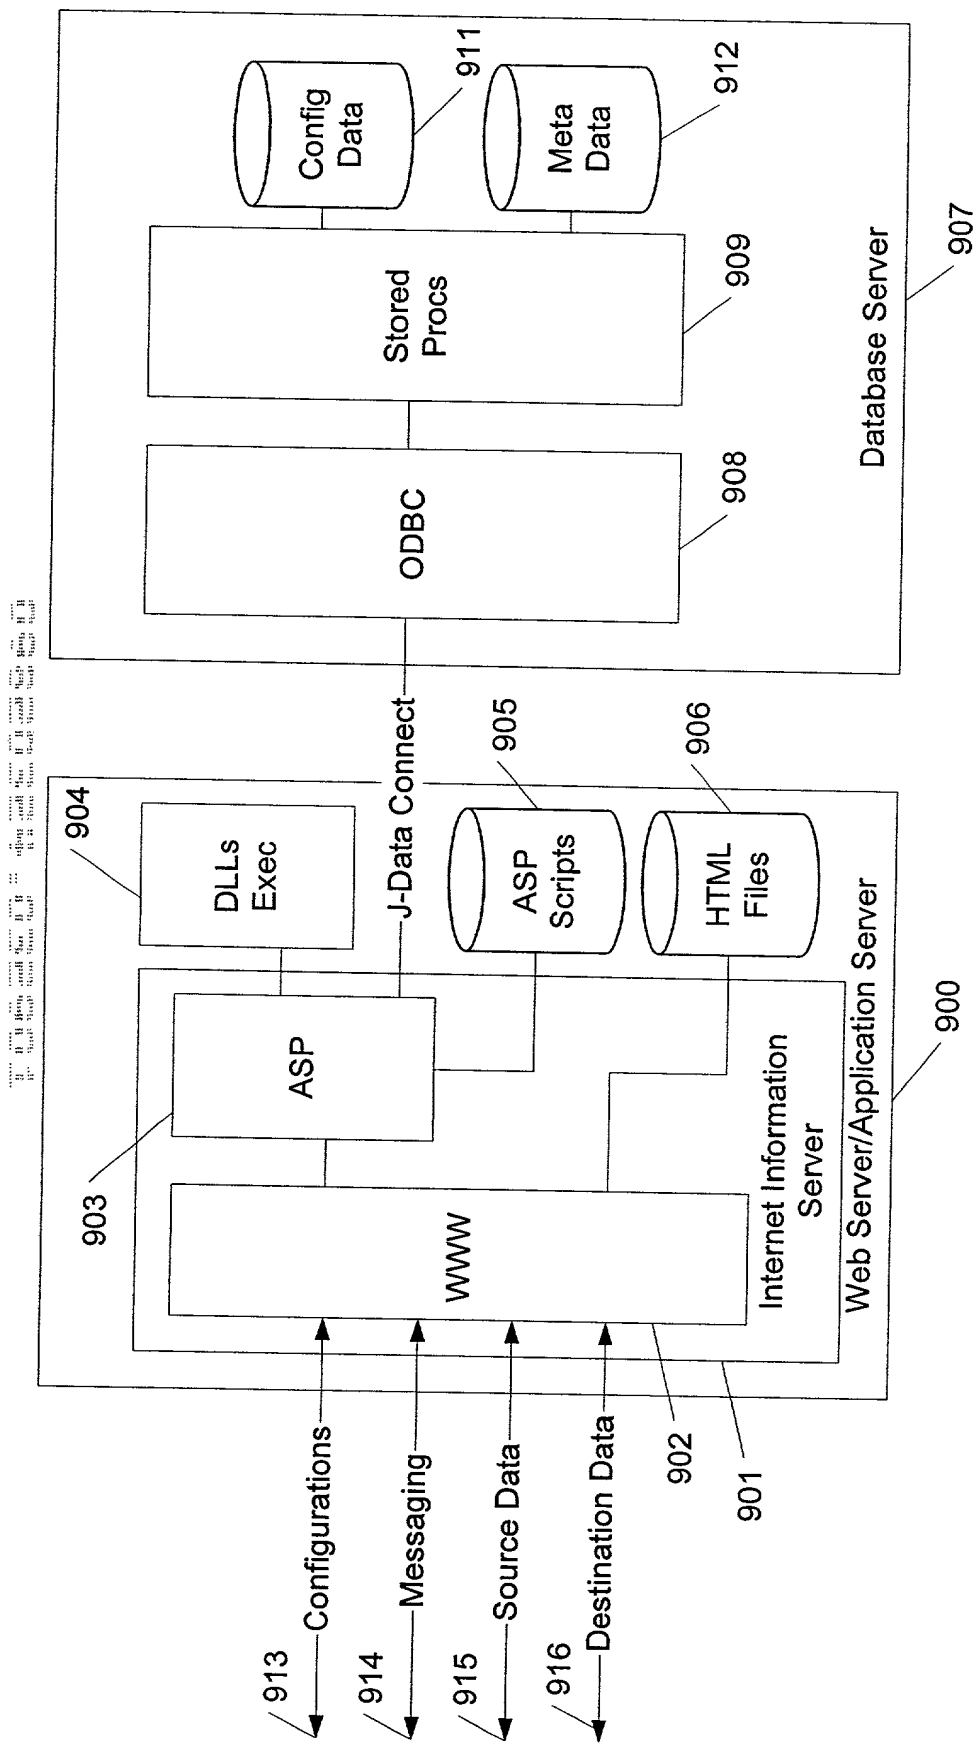

Figure 6

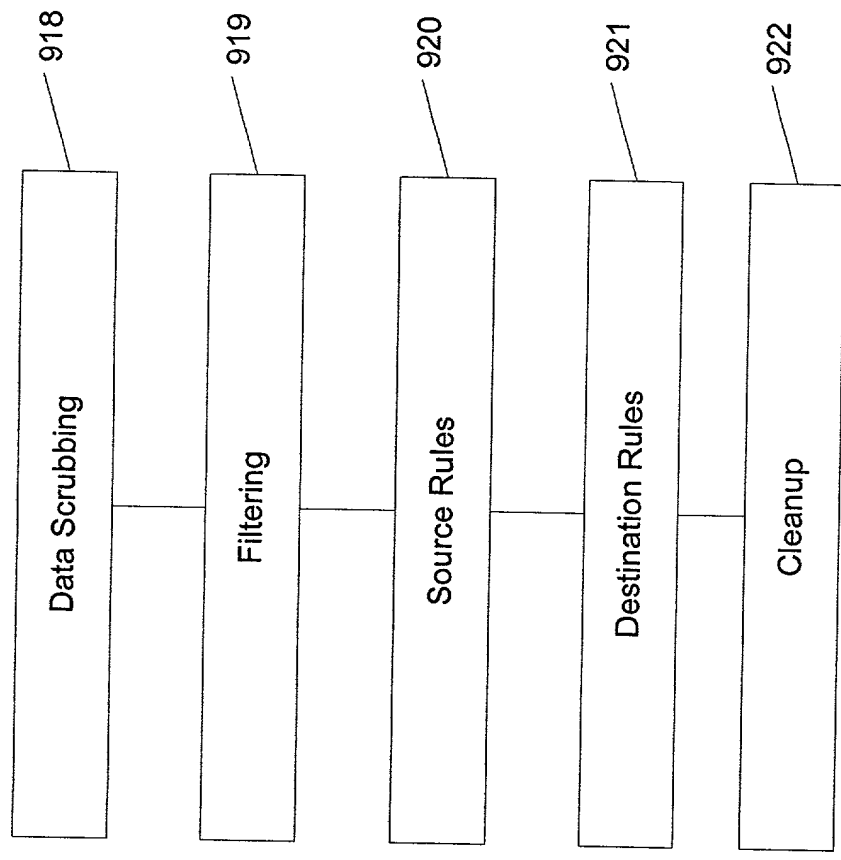

Figure 7

FIG. 8 is a block diagram of a system architecture for processing supplier data. The system includes a central processing unit (1100) that receives input from four supplier data sources (1101, 1102, 1103, 1104) and outputs to three mapping processes (MP 1, MP 2, MP 3). The central unit (1100) is composed of several functional layers: Security Layer (1105), Pre Map Validation (1106), Mapping (1107), Pre Edit Rules (1108), Edit Rules (1109), and Post Edit Rules (1110).
